**Hanna is microchipped**, access to microship account will be provided.

Foster Volunteer – Jeff Yates, Cellphone 361-219-7113

Hanna loved the Christmas House.

She loves catnip and treats.

Hanna was rescued by Jeff on November 5, 2020. This sweet kitty had been a stray for approximately 2 months around an apartment complex where tenants began to abuse her to drive her away. She approached a caring resident who contacted AAMC and was then rescued by Jeff. Hanna has been safely cared for in his home since the rescue.

Sadly, although the previous owner was contacted on the day of rescue after a obtaining the microchip information, that family declined to reunite with her. Since that time, the microchip account has been transferred to AAMC and will be provided to Hanna's Forever Parent when she is adopted.

She will thrive in a calm household and would prefer to be the only pet, however she does very well with the younger foster cats at Jeff's house. She loves toys and window gazing. She is extremely well mannered and uses a fully enclosed cat box with a swinging door.

Call or text Jeff at the number above if you would like to meet this sweet, loving kitty.

**AAMC will be returning to the Cat Residence at PetSmart during March 2021!**

*You may meet and adopt Scout during that time! Please contact Jeff at the number above to arrange a visit with Scout.*
